

Bentley Systems Announces Strategic Agreement with Worldsensing

Press Release

Barcelona, Spain, March 24th 2023

Worldsensing Acquires sensemetrics Thread Connectivity Business, While Bentley Becomes Lead Investor in Worldsensing's Series D Capital Raise, and Both Parties Align on a Unique Joint Go-to-Market Offering

EXTON, Pa., and Barcelona, Spain – Bentley Systems, Incorporated (Nasdaq: BSY), the infrastructure engineering software company, today announced it has entered into a non-exclusive commercial agreement to strategically accelerate the adoption of Infrastructure IoT, further unlocking value for infrastructure designers, constructors, and owner-operators in their use of infrastructure digital twins. As such, Worldsensing is acquiring the sensemetrics Thread connectivity business to expand its portfolio offering. Bentley also becomes the lead investor in Worldsensing's Series D capital raise.

Worldsensing's acquisition of the sensemetrics Thread connectivity business will expand and complement the company's product portfolio, offering new options to its customers where adaptive sensor integrations or active sensor management are a key requirement. Thread offers broadband sensor connectivity uniquely to connect dynamic, high-power, or high-speed sensors and stream sensor data to the cloud for analysis. Thread is a fully autonomous sensor connectivity device with optional integrated 4G/LTE cellular modem, wireless mesh networking, and battery pack in a weather resistant enclosure. Each broadband device also serves as a gateway for wireless

smart sensors. Combined with Worldsensing’s existing market-leading offerings, Thread will be a driver for new growth opportunities. Worldsensing will become a preferred sensor connectivity partner to Bentley and Bentley will become a preferred IoT software partner to Worldsensing offering mutual users a best-in-class fully integrated end-to-end sensor management solution.

“We are thrilled to enter into this agreement with Bentley Systems,” said Ignasi Vilajosana, CEO of Worldsensing. “The acquisition of the sensemetrics Thread connectivity business will expand our portfolio and allow us to provide more options to our customers. We are pleased to become a preferred sensor connectivity partner for Bentley iTwin IoT as it confirms our position as the reference connectivity platform for mining, construction, rail, and infrastructure monitoring.”

“We are excited to partner with Worldsensing and believe that this strategic agreement will bring significant benefits to our respective user bases,” said Justin Schmidt, vice president, corporate development with Bentley Systems. “We are confident that the combination of Worldsensing’s expertise in IoT solutions and our leadership in infrastructure digital twin software will create a powerful offering for the market.”

Worldsensing's Connectivity Devices fully integrated with Bentley's sensemetrics and iTwin IoT Software

About Worldsensing

Worldsensing is a global IoT pioneer. Founded in 2008, the infrastructure monitoring expert serves customers in more than 70 countries, with a network of global partners to jointly drive safety in mining, construction, rail and structural health.

Worldsensing is headquartered in Barcelona and has a local presence in the UK, North and South America, Singapore, Australia and Poland. Investors include Cisco Systems, Mitsui & Co, McRock Capital, ETF, Kibo Ventures and JME Ventures.

About Bentley Systems

Bentley Systems (Nasdaq: BSY) is the infrastructure engineering software company. We provide innovative software to advance the world's infrastructure – sustaining both the global economy and environment. Our industry-leading software solutions are used by professionals, and organizations of every size, for the design, construction, and operations of roads and bridges, rail and transit, water and wastewater, public works and utilities, buildings and campuses, mining, and industrial facilities. Our offerings, powered by the iTwin Platform for infrastructure digital twins, include MicroStation and Bentley Open applications for modeling and simulation, Seequent's software for geoprofessionals, and Bentley Infrastructure Cloud encompassing ProjectWise for project delivery, SYNCHRO for construction management, and AssetWise for asset operations. Bentley Systems' 5,000 colleagues generate annual revenues of more than \$1 billion in 194 countries.
