

**Notice of Product End of Life
(hereinafter referred to as “EOL”)
for LS Dlog App**

Dear Customer,

We begin by expressing our gratitude for the trust in Worldsensing products. We understand the importance of anticipating changes in your business. Therefore, we are providing you with a notice regarding an upcoming change to our product line.

At Worldsensing, continuous improvement is part of our ethos. A few months ago, we launched the new **Worldsensing App**, which offers enhanced features and better performance for configuring and operating our Loadsensing nodes. As a result, we have made the decision to discontinue the former **LS Dlog App**, effective from 1st day of September, 2023.

Considering this, we kindly request that you migrate to the **Worldsensing App** at your earliest convenience to avoid any inconvenience or service disruption. Should you choose to retain the **LS Dlog App** in your systems, please be aware that the applicable [Terms of Use](#) will remain in effect indefinitely.

If you have any immediate questions or concerns, please contact your Sales representatives. They will work with you to help support your projects and evaluate the best options available.

Once again, thank you for your business and your understanding.

Sincerely,

Ignasi Vilajosana
CEO
Worldsensing
